

Clarity

Clearly Different

5.5x10¹⁰ cfu/g *Bacillus subtilis*

BioGro approved.

Clarity is a natural biological fungicide based on *Bacillus subtilis* mbi600. Sourced from Becker Underwood an international specialist in biological fungicides and insecticides the product is of the highest quality.

Trialled in New Zealand since 2008 it has shown to give equivalent performance to other *B.subtilis* based products in the field against *Botrytis* in wine grapes. With significant benefits in fruit appearance, product handling and mixing for the grower.

Formulation and Handling

- Clarity is a highly concentrated product without excess fillers. No chalky residue!
- Low application rates
- Packaged in a 1ha (265g) application sachet
- Mixes easily and rapidly in the spray tank without pre-mixing or lumps.
- As with all biological products store in a dark place out of direct sunlight
- Does not require refrigeration

Efficacy Trials in NZ

Two years of trials in the Hawke's Bay have been completed comparing Clarity to other products for late season botrytis control.

Trial conducted by Agrivet (Geelen), Chardonnay, Te Mata Mangateretere Road, Havelock North

Use Rate: 265g or 1 sachet per hectare regardless of water rate. A minimum of 265g/ha is required to achieve product efficacy.

Water Rate: Water rates may vary according to sprayer and vineyard. Use enough water to spray to drip only, DO NOT SPRAY TO RUN OFF

Spray target area: Full canopy

Do not apply in heat or bright sunlight. Apply early morning. Always consult your rep in regards to what products can be tank mixed. Do not combine with other biologicals, fungicides and phosphoric acid based foliar fertilisers.

STORE IN COOL DARK PLACE
DO NOT EXPOSE TO UV LIGHT DURING STORAGE
