MIXING INSTRUCTIONS:

1. Add one quarter of the spray water to the tank and begin agitation.
2. Either pre-dissolve the powder in 5 times its volume of water or add to the inlet screen of the spray tank and wash into the spray tank with the remainder of the water.
3. Add any trace elements next starting with solids, then dispersions and finally solutions.
4. Lastly, add any chemicals.
5. Apply immediately. Do not store mixed chemicals.
