

TURF

Turf is a complex crop to manage and maintain in pristine condition, health and appearance. To do so requires specialised high performance inputs that you can trust. Grochem's professional range delivers exceptional performance, highest specification and value for money.

WATER SOLUBLE TURF SPECIALITIES

Our free flowing NPK powders with Trace Elements are designed as a complete foliar nutrition product, fully soluble, fully plant available, easy to handle, with no precipitation once in solution they will not clog or corrode equipment.

TURF HI N™ is a balanced high Nitrogen fertiliser suited to supporting strong top growth and colour in the spring and summer. NPK of 28 – 2 – 15 + TE including Iron.

FUNGICIDES

CLARITY™ is a highly concentrated Bacillus subtilis powder for the control of a variety of fungal and bacterial diseases in turf. Used at just 265g to 530g per hectare.

OTHER

GROWTH™ is a plant growth regulator containing 40g/L Gibberellic Acid (GA-3) with a wide range of uses including growth promotion. This liquid formulation is easy to handle, measure and mix.

ETHIN™ is a 480g/L Chlorethephon SC for use in turf.

ALGA 600™ is a fully soluble seaweed powder. Made by extracting the goodness from three different varieties of seaweed using low temperature, fast drying cell burst technology. No harsh chemicals, no additives, heavy metals, nitrates or preservatives!

TRACE-IT™ TOTAL is a complete micro-nutrient product for prevention and correction of trace element deficiencies.
