Approved pursuant to the HSNO Act 1996, under the Fertilisers (Subsidiary Hazard) Group Standard 2006. HSR002571. See www.epa.govt.nz for approval conditions.

Net Contents: 20 Litres

PLEASE READ LABEL AND SAFETY DATA SHEET COMPLETELY BEFORE USE

FIRST AID:

Call a POISON CENTRE or doctor/physician if you feel unwell. If medical advice is needed, have product container or label at hand.

IF SWALLOWED: Give water if conscious.

IF IN EYE: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do so. Continue rinsing. Immediately call a POISON CENTRE or doctor/physician.

IF ON SKIN: Wash with soap and water. If skin irritation occurs, get medical advice/attention.

IF INHALED: Remove to fresh air and seat in a position comfortable for breathing.

24-hour Emergency Telephone Number – For advice contact the National Poisons Centre – 0800 POISON (0800 764 766) – or a doctor, immediately. Have product container or label at hand.

For specialist advice in an emergency only, call CHEMCALL (24hrs) 0800 243 6225. In a transport emergency dial 111.

HANDLING ADVICE:

Wear gloves and face protection. Wash hands and exposed skin thoroughly after handling. Use only outdoors or in a well ventilated area. Collect spillage.

SAFETY DATA SHEET:

A Safety Data Sheet is available from GroChem or www.grochem.co.nz

STORAGE & TRANSPORT:

Store in a cool place away from foodstuffs. Do not carry more than 5L on a passenger service vehicle.

DISPOSAL:

Dispose of product by using as directed on this label or at an approved landfill. Triple-rinse empty container into the spray tank and deliver to an Agrecovery collection depot.

CONDITIONS OF SALE:

As no control can be exercised over the manner in which or the conditions under which this product is used, all conditions and warranties expressed or implied, other than those required by statute are excluded. No responsibility will be accepted for any damage or injury whatsoever arising from the storage, handling, application or use of this product.

DIRECTIONS FOR USE

Trace-it Zinc Sulphate may be applied with most herbicides, insecticides, fungicides or nutrient sprays. It is compatible with most chemicals, but for unknown or doubtful chemicals a test mix should be made up. Generally, Trace-it Zinc Sulphate should be added before most chemicals, except where a product data sheet specifies otherwise i.e. cupric hydroxide. Always apply diluted or mixed chemicals immediately, do not store.

Trace-it Zinc Sulphate should be applied in low light conditions in the morning or evening or on cloudy days. Do not apply during periods of high sunlight, during rain or prior to expected rain.

Water Rate: For field use, use at least 100 litres per hectare. For horticultural use, use at least 500 litres per hectare. For glasshouse use, use 50 to 100 litres of water per 1000m².

APPLICATION RATES:

General Field Applications	1-3L/ha	
Potatoes	3L/ha (Two equal applications)	2 weeks after emergence and two weeks before tuber initiation.
Grapes	3-4L/ha	Use from pre-flowering, 2nd application post-harvest (late leaf fall) and consider a third application during dormancy, but at least 2 weeks before bud break.
Pipfruit	3-4L/ha	Use only as a post-harvest application (late leaf fall) and consider a second application during dormancy, but at least 2 weeks before bud break.
Stonefruit	3-4L/ha	Use only as a post-harvest application (late leaf fall) and consider a second application during dormancy, but at least 2 weeks before bud break.
Glasshouse Application	400-800mL/1000m ²	Where deficiency is severe, several applications at the lower rate, at 2-3 week intervals are recommended.
Generally, where a deficiency is severe, several applications at the higher rate, at 2-4 weeks intervals are recommended.
