

AMBITIOUS QUICK START FACT SHEET APPLES

ACTIVE INGREDIENTS

- ➔ Ambitious 10 SL contains 10g/L Forchlorfenuron (CPPU) in the form of a soluble concentrate. It is a plant growth regulator of the cytokinin class.

GENERAL INFORMATION

- ➔ Ambitious is a very active PGR with Cytokinin activity.
- ➔ Accelerates cell division, cell number and cell size.
- ➔ Strong fruit sizing ability - promotes fruit enlargement.
- ➔ Approved by ACVM.

RATES / APPLICATION

- ➔ **Recommended Rate:** 50-100ml per 100L Water (500-1000ml/ha).
- ➔ **Timing:** Apply at 10mm king fruit stage.
- ➔ Good even coverage is essential as no translocation occurs.
- ➔ Apply sufficient water volume to cover fruitlets, but avoid excess runoff.
- ➔ Application is best made on the morning of a warm day (>20°C) to allow for absorption.
- ➔ Use non-ionic surfactant (Spray-Aid) @ 75-100ml/100L water.
- ➔ Use pH buffering agent (Buff-it) @ 50-100ml/100L water.
- ➔ Best applied alone.
- ➔ Rainfast in 2 hours – avoid spraying if rain is expected.
- ➔ See label for full use instructions.
