SAFETY DATA SHEET: A Safety Data Sheet is available from Grochem or www.grochem.co.nz.

STORAGE AND TRANSPORT: Store in a cool place. Do not carry on a passenger service vehicle.

HANDLING ADVICE: Wear gloves and face protection. Do not breathe spray. Do not eat, drink or smoke while using this product. Wash hands and exposed skin thoroughly after handling. Use only outdoors or in a well ventilated area. Do not allow product to enter waterways.

DISPOSAL: Dispose of product by using as directed on this label or at an approved landfill. Triple-rinse empty container into the spray tank, and deliver to an Agrecovery collection depot.

FIRST AID:

IF SWALLOWED: Call a POISON CENTRE or doctor/physician if you feel unwell. Rinse mouth.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do so. Continue rinsing.

IF ON SKIN: Wash with plenty of soap and water.

IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing.

If eye or skin irritation persists, or if concerned or unwell: Get medical attention/advice.

CONDITIONS OF SALE: This high quality product is suitable for the purpose advised on the label but as Grochem cannot exercise control over mixing or applications, all conditions and warranties, as to its use for any purpose, are excluded and no responsibility will be accepted by Grochem for any damage or injury whatsoever arising from its storage or application.

Approved Pursuant to the HSNO Act 1996, Additives, Process Chemicals and Raw Materials (Subsidiary Hazard) Group Standard 2006, No HSR002503. See www.epa.govt.nz for approval conditions.

DIRECTIONS FOR USE

Antifoam 'A' is an aqueous emulsion of a polydimethylsiloxane fluid for use as an antifoam agent in agricultural spray systems. It is a free flowing ready to use liquid that may be added before or after foaming occurs.

Antifoam 'A' should be added directly to the spray tank. The amount to use varies with the chemicals

being used but will usually be 10 –100mls/100L of water. For most applications the lower rate will be satisfactory and it is recommended that the 10mls/100L rate is initially tried for all applications and that this is increased only as necessary.
