STORAGE AND TRANSPORT: Store locked up in a cool dry place away from foodstuffs. Do not carry more than 10kg on a passenger service vehicle.

SAFETY DATA SHEET: A Safety Data Sheet should be available at all work places where Gro-Mag Super is stored or used (available from Grochem or www.grochem.com).

DISPOSAL: This product should be disposed of by use in the manner described on the label, or by depositing it in an approved landfill. Dispose of empty packaging by burying in an appropriate landfill.

CONDITIONS OF SALE: As no control can be exercised over the manner in which or the conditions under which this product is used, all conditions and warranties expressed or implied, other than those required by statute are excluded. No responsibility, will be accepted for any damage or injury whatsoever arising from the storage, handling, application or use of this product.

Approved Pursuant to the HSNO Act 1996, under the Fertilisers (Subsidiary hazard) group standard. No HSR002571. See www.epa.govt.nz for approval conditions.

DIRECTIONS FOR USE:

Finish-it Plus has been developed as a foliar feed for foliar application to horticultural crops. It should be used as part of a season long foliar programme but should not be applied during periods of stress such as drought, low temperatures, excess rain etc. It is designed to be absorbed by plant foliage and will not burn or scorch plant growth when applied at recommended rates.

Contains the growth stimulant TRIACONTINOL.

APPLICATION RATES:

CROP	USE RATE	WATER RATE
Kiwifruit, Citrus, Avocado, Grapes, Pipfruit, Stonefruit, Hops	3-5kg/ha	Dilute application recommended but can be applied by concentrate spraying. Aerial spraying minimum water rate 60L/ha
Beet & Fodder Brassica, Field Crops	3-5kg/ha	Conventional 200L/ha Aerial spraying 100L/ha

Ensure adequate leaf cover is present and apply when the plant is actively growing to ensure effective uptake. Avoid application during the heat of the day. Adequate water coverage is an essential component of effective foliar spraying.

MIXING INSTRUCTIONS

- 1. Add one quarter of the spray water to the tank and begin agitation.
- Either pre-dissolve in 5 times its volume of water or add to the inlet screen of the spray tank and wash into the spray tank with the remainder of the water.
- Add any trace elements next starting with solids, then dispersions and finally solutions.
- 4. Lastly, add any chemicals.
- 5. Apply immediately. Do not store mixed chemicals. Note: where a product data sheet specifies that the products should be added in a different order than above i.e. copper hydroxide etc. then follow those instructions. If any doubt about compatibility or if unfamiliar chemicals are being used, then a trial mix is recommended.
