

Soleto™

SOLETO™

Pre-emergent herbicide for potatoes.

European technology for New Zealand potato growers.

- Active – Metobromuron 500g/L SC
- Activity – Photosynthesis inhibitor (II)
- Resistance group - C2 Herbicide
- Mode of action - Contact and residual activity.
- Weed target - Broadleaf weeds (Dicots) and some grasses.
- Current NZ label - Annual broadleaf weeds, Redroot and Fathen

PRODUCT BENEFITS

- Broad weed spectrum.
- Very high crop safety, no variety restrictions.
Safe on Metribuzin sensitive varieties such as Innovator and VR808.
- Good persistence – half life of 22 days in soil and only moderately soluble, ensuring effective weed control until after row closure.
- Effective under all conditions with consistent result.
Including drought conditions.
- Tank mix flexibility – talk to your local agronomist for recommendations.
- Tried and trusted in UK and Europe for more than 10 years.
- Assessed for efficacy and crop safety in multiple trials in Canterbury and Pukekohe over three years prior to registration.

APPLICATION TIMING

Pre-emergence.

PRODUCT RATE

3 L per hectare when applied alone.

Discuss tank mix combinations with your agronomist.
